

TAPB Meeting Evaluation feedback

19th July 2016 - Housing

I would like to see the following as a topic at a meeting:

- More input from parents
- Problems when living independently
- Employment opportunities? Awareness to local larger companies, who may then employ people on autism spectrum
- Could do with more time to cover the topics without rushing
- Mental health and autism
- Who to talk to and when - contact information may be useful.
- Contribution from Primary Care. GPs?
- Support for Carers.
- Non Accommodation based housing related support.
- Developing directories of contacts (There is one for ELFT, one for LBC and one for Autism Beds)
- Do people with autism have any priority on the housing list or do they have to go through the same process?
- Evening session for those that work. Accommodation i.e homes that cater for people that have Autism but cannot cater for themselves.
- What social activities are there for people with Aspergers other than Autism Bedfordshire.
As this appears to be the only resource available.
- Perhaps anonymous case studies of solutions provided to individuals.
- They were not useful - except the one from Bedford Borough. I would like to delivery plan to be discussed at each meeting in terms of progress made against the actions under each theme (assuming there are actions under each theme that the TAPB agrees it will work towards resolving/influencing).
- Benefit System
- Training update across all sectors
- Whatever people with autism and carers feel is most needed.
- If people on the autistic spectrum are experiencing problems with neighbours, etc
- Training
